DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore in claims 6 or 7, the first, second and third lines totally external to an interior of the substrate with unequal thickness, in direct surface-to- surface contact with the substrate, wherein the third line is coupled to the first and second line with the first circuit line coupled to a top surface of the substrate and a second circuit line coupled to a bottom surface of the substrate, or a PTH connecting first and second lines with a third line totally external to the substrate in direct surface-to- surface contact with the substrate, and coupled to the first and second line wherein the lines each have different thickness must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 6, 7 and 28-36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably

convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the original disclosure for a first and second lines with a third line totally external to the substrate in direct surface-to- surface contact with the substrate, and coupled to the first and second line wherein the lines each have unequal thickness with a first circuit line coupled to a top surface of the substrate and a second circuit line coupled to a bottom surface of the substrate.

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 2-7, 9-13 and 27-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear how the first, second, and third circuit line includes a pad, yet it does not consist essentially of a pad. The limitations are mutually exclusive.

Claims 2 and 3 recites the limitation "the interior" in Line 6. There is insufficient antecedent basis for this limitation in the claim.

Claims 2-7,9-13 and 28-36 have not been rejected over the prior art because, in light of the 35 U.S.C. 112 rejections supra, there is a great deal of confusion and uncertainty as to the proper interpretation of the limitations of the claims; hence, it would not be proper to reject the claims on the basis of prior art. As stated in In re Steele, 305 F.2d 859, 134 USPQ 292 (CCPA 1962), a rejection should not be based on considerable speculation about the meaning of terms employed in a claim or

assumptions that must be made as to the scope of the claims. See also MPEP 2173.06.
